

FIRE ALARM

Instructions and Information

Please read the information and suggestions for fire safety in this folder – *it could save your life*. Where possible we have included any instructions for the alarms in this folder.

The code to turn off the fire alarm is: **4415**

If an alarm is triggered accidentally input the alarm code and the wailing will stop, this will be replaced by a fault beeping noise. Call us (445 0662) and we will ask the electrician to check the system and reset the alarm again, though this may take a few days.

There are large foam fire extinguishers in the hallways and there is a powder extinguisher and fire blanket in the kitchen. The extinguishers and fire alarms are serviced every year.

Tenants are reminded that fire equipment is provided for your safety and **improper use or tampering with fire equipment will result in a deduction from your deposit.**

In an emergency please call our office number (**0161 4450662**) and you will be forwarded to the mobile number of our out-of-hours emergency maintenance team member.

Please note:

All unnecessary call-outs and tampering with the equipment will incur charges that must be paid by you, the tenants.
